

Anveet Pal

Computer Science Engineer · Python Developer

8602875539 | anveetpal12@gmail.com | linkedin.com/in/anveet-pal | github.com/anveetpal01

SUMMARY

Computer Science graduate and backend developer with experience in Python (FastAPI/Flask) and JavaScript/TypeScript ecosystems. Built REST APIs, async pipelines, and ML integrations. Currently exploring LLM-based agents, function calling, and conversational AI systems.

SKILLS

Languages: Python, JavaScript, TypeScript, C#, SQL, HTML/CSS

Backend & Frameworks: FastAPI, Flask, Django, .NET, REST APIs

Frontend: React.js, Next.js, Streamlit

Data & ML: Pandas, Seaborn, XGBoost, scikit-learn, Power BI

Computer Vision: OpenCV, YOLO (Ultralytics), ByteTrack, GPU inferencing

Databases & Tools: MySQL, MSSQL, Git & GitHub, Postman, VS Code, PyCharm

Other: Automation (Selenium), Playwright, CI/CD basics, ETL

EXPERIENCE

Python Developer · Miraigate Technologies

Feb 2026 – Present

- Build and maintain Python automation scripts and computer-vision modules across multiple ongoing projects in a fast-paced startup setting.
- Collaborate on coding, debugging, testing and project coordination to support simultaneous deliverables.
- Contribute to 4+ concurrent projects, adapting quickly to shifting priorities and evolving tech requirements.
- Designed async Python backend flows and webhook integrations for real-time data processing

Junior Consultant Intern · Hosho Digital

Jul 2025 – Nov 2025

- Developed Python scripts for backend data pipelines and REST APIs, managing databases and ensuring smooth frontend integration.
- Automated software tasks with Python and .NET, including data modeling with the Microsoft Power Platform.
- Performed data engineering and analysis with Pandas and Seaborn to deliver custom client solutions efficiently.

Python-ML Intern · Alveofit (Roundwork Technologies)

Feb 2025 – Mar 2025

- Built and deployed a two-stage XGBoost ML pipeline for real-time asthma severity prediction; monitored model performance through EDA.
- Implemented a Flask REST API with robust input validation and error handling, integrating the model for production use.

PROJECTS

Offline AI Coding Agent · Python · FastAPI · Ollama · LLM Tool Calling

- Built a Claude-Code-style local coding agent from scratch — plan→act→observe loop with tool orchestration (read/write/edit files, run commands), fully offline on 8GB VRAM via Ollama (qwen3:8b / qwen2.5-coder:7b).
- Designed a swappable LLM abstraction layer enabling hybrid online/offline mode (local Ollama ↔ OpenAI SDK); robust JSON tool-call validation with auto-retry on malformed responses.

- Shipped three front-ends on one agent core: Rich CLI, FastAPI + WebSocket web UI, and pywebview desktop app — bundled into a single Windows executable via PyInstaller.

CCTV Vehicle Counter · Computer Vision · Python

- Real-time computer-vision pipeline that detects, tracks and counts vehicles from live CCTV streams with low-latency, GPU-accelerated inference (FP16).
- Designed a line-crossing counter with occlusion handling, ghost-track suppression, and multi-class aggregation across concurrent video streams (ByteTrack).

Disease & Asthma Prediction API · Flask · XGBoost · ETL

- ETL-driven Flask REST API serving an XGBoost model for real-time disease severity prediction with feature encoding and robust error handling.
- Source: github.com/anveetpal01/myProjects/tree/main/xgboost_treat_api

Multi-User Task Management System · Python · FastAPI · SQL · JWT

- Scalable backend API with automated tests (Pytest) and cloud deployment on Render.
- Secured with JWT and password hashing; focused on data privacy and clean error handling.

Rewards Management API · .NET 8 · C# · MySQL

- RESTful API for member accounts, reward-points accrual and coupon redemption, following clean-architecture principles.

Personal Portfolio Website · Next.js 16 · TypeScript

- Designed and shipped a static, server-rendered portfolio (Next.js 16 App Router, TypeScript, Tailwind v4) — ~50 prerendered pages for project, skill, tech and company case-studies, with reusable Markdown deep-dives, accessible focus-trapped Lightbox and zero-dependency SVG charts.

EDUCATION

B.Tech, Computer Science & Engineering · Mediacaps University

2021 – 2025

CERTIFICATIONS

- Microsoft Power BI — Advanced Analytics, Data Visualization, Business Intelligence
- Alteryx — ETL, Data Analytics, Analytical Problem Solving
- Figma — UI/UX, Web Design
